

# IP-FAST

## EPOXY RESIN WITH FAST POLYMERIZATION

New cold mounting resin high performance by PRESI.

### LOW VISCOSITY

Perfect for a better penetration of the resin into the sample.

### FAST POLYMERIZATION (2h)

Controls and analysis times process reduced.

### VERY LOW SHRINKAGE

Preserves the edges of the sample and reduces the risk of pollution.

### EXCELLENT HARDNESS (89 ShD)

Make easier polishing process for better flatness.

### TRANSPARENT RESIN

Better visualization of the sample.

# innovate.

THE PRESI SIGNATURE. ALL AROUND THE WORLD.

## IP-FAST RESIN

**IP-FAST epoxy resin** was designed to reduce significantly controls and analysis times of the mounted samples. This transparent resin has an excellent hardness (89 ShD), a very low shrinkage and viscosity. Its big advantage is to **polymerize very quickly** (in 2 hours).

REF.	DESCRIPTION
04070	Pack 1kg IP-FAST resin + 300CC catalyst
04071	Bottle 300CC catalyst IP-FAST resin
04072	Bottle 1KG resin IP-FAST

## PRESSURE VESSEL

The vessel for mounting under pressure can dramatically improve the quality of mounts : more **transparent** and reduced **shrinkage**.

## FOR USE WITH ...

IP-FAST resin can be used with **moulds**

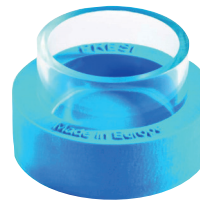

Teflon

Rubber

Polyethylene

KM<sup>2.0</sup>

...and with **accessories**

Spring clips

Holding clips

Paper cups

Nitrile gloves

## PRESI, IT'S ALSO...

### CUTTING

EVO 400

### MOUNTING

Mecapress 3

### POLISHING

Mecatech 334

### HARDNESS & MICROSCOPY

HZ50-4 hardness tester

### CONSUMABLES

Abrasive discs
